</tbody>
</table>

System Controls dialog

- Option ON
- Option OFF

Display illumination
- Set brightness and select day/night mode from the System Controls dialog
- Repeat short presses on the Power key to cycle the backlight brightness
Pages

- Toggle between the Sonar and the Flasher pages by pressing the Pages key.
- Zoom the sonar image by using the Zoom keys.

By default the unit is set to **Auto** mode, and all settings are automated.
- Change to **Custom** mode to allow for customizing the settings.

Overlay data

By default, 3 data items are displayed on the image. The data items are predefined (depth, temperature and voltage), and the position is fixed. The data items can be turned on/off from the System Controls dialog.

Each data item can be removed individually from the image:

1. Select the **Edit overlay** option in the System Controls dialog to turn the unit into edit mode
2. Press the Menu/Enter key to display edit options
3. Press the X key to leave edit mode

Settings dialogs

Used for system configuration.
